Vpcote. 1615.

A Prognostication for the yeere of our Lord GOD. 1615.

Made and written by Augustine Vpcote Gent. practitioner in Phisicke.

Imprinted at London for the Companie of Stationers.
1615.

(·)

A Deſcription of the fower Quarters of the yeare. 1615.

And firſt of Winter quarter, the Sunne in *Capricorne*, *Aquarius*, and *Piſces*.

THe vſuall Winter quarter for this yeare of our Lord God 1615, began the xii. day of December laſt 1614. when the Sun entred into the firſt minute of Capricorne, and ſhall continue till the xi. of March following, ſo that the firſt part of the Aſtronomical Winter is in one politicke yeare, and the latter end thereof in the other, this ſeaſon of it's owne natrall diſpoſition is knowne to be cold and moiſt contrary to the quality of Summer. In this Quarter of the yeare the natrall heate of man is drawne inwards, & the extreme parts grow cold, wherefore that body that is healthfull and hath a good digeſtiue facultie, may feed more freely and take more plenty of meat then either ỳ ſpring-tide or ſummer ſeaſõ will allow.

As concerning the weather, it is like to bee extreame both in froſt and ſnow, and cold raine vntill Candlemas, and then not to be ſo variable and extreame, but more temperate, and the laſt part thereof to be fayre enough: The ſicknes that this quarter are moſt likely to inuade our bodies, are Feuers of all ſorts, Rhumes, Cathars, Coughs, Hoarſenes, Pallies, Apoplexies, paine in the head and belly, paines in the thighes and knees, Dropſies, weakeneſſe and paine in the backe, griefes in the breaſt, Stomack and Lungs: Whereof many old men and women are like to endure and feele the extremity thereof.

The

The second quarter of this yeare called the Spring; the Sun in *Aries*, *Taurus*, and *Gemini*.

The Sunne hauing finished at full the winter Quarter with the last part of Pisces, maketh his entrance the xi. day of March when the Sun entreth into the first minute of Aries the Equinoctiall signe, making the Equinoctiall point, making the day equall with ỳ night, continuing vntill ỳ xii. day of June next ensuing: This season is naturally hot and moist, the most temperate and healthfull time of all the yeare, not apt to breed any sickenesse, but to produce and bring forth such as hath beene ingendred in the body alreadie at other times: The reuolution of this quarter doth threaten many dangerous angers, alls trike and debate amongst rich men, forging and spreading of newes. This Quarter is hot and moist resembling the Element of ayre and the Sanguine complexion. As for such diseases which are likely to be common this quarter, are Coughs, paines in the sides, tertian Agues, vertigo and swimming in the head, Scabs, itchings, Measels, and small pox, paines in the eyes, paines in the Diaphragma, and Lungs, sundrie flures, swellings, and ach in the ioynts.

Of the third Quarter of the yeare called Summer; the Sunne being in *Cancer*, *Leo*, and *Virgo*.

The third part of the yeare which is called Summer, alwaies taketh his beginning when the Sunne entreth into the first minute of Cancer, which causeth the longest day and shortest night in all the yeare, which will now happen the xi. of June, and so will continue the Summer Quarter vntill the xiiij. of September following. This Quarter according to his nature is hote and drie, and by the meanes thereof worketh in the bodies of men diuers alterations caus-

sing many hot cholericke diseases: stirring vp men to contention, quarrelling, warre, and conspiracies. This revolution sheweth robberies, spoyling, and violent oppression, and taking away of mens goods violently, and wrongfully, with imprisonment, and other trouble that shall happen to them otherwise.

The sicknesses of this time are generally hot Feuers, tertians, continuall and maligne agues, Plurisies, spitting of blood, Diarheas, flures of sundrie sorts, sores in the mouth, shortnes of breath, paines in the stomacke and belly.

Of the fowrth Quarter of the yeare called Autumne or Harueſt season: the Sun being in *Libra*, *Scorpio*, and *Sagitarie*.

HArueſt or the Fall of the leafe is the last part of the yeare Astronomicall, which is the most profitable season of the whole yeare, and it doth begin when the Sun entreth into the first minute of the second Equinoctiall signe Libra, which wilbe this yeare the xiij. of September, at which time the day and night is of equall length as before in March. The disposition of this season is euermore inconstant and variable, by which meanes it is the nurse and foster of most sicknesse happning in the Spring. Concerning which diseases which are likely to happen, they are quartan Feuers, blacke Jandis, Consumptions, Dropsies, Strangories, the Gout, small Pore, and Measels, with many others which shall not need to bee named, although they bee painefull to be suffred.

Wherefore I admit all sorts of people to haue a speciall regard to their diet, whereby they may auoyd many of the forenamed diseases, and if need be let them vse the counsell of the honest, learned Phisitian. I say honest, because it is two things to bee both learned and honest together.

Elegi-

Elections both Phiſicall and Medicinall.

ELection or obſeruation of certaine daies, which be either good or euill to doe any notable buſineſſe in, but chiefely Medicines, Blood-letting, Purging, and ſuch like, which doth concerne the health of mans body: And becauſe it is dayly ſubiect to diſeaſes and infirmities, it doth require the greater care and diligence to be had in preſeruation and keeping the health therof. Wherefore heere doth follow certaine rules for bleeding and purging, bathing and ſweating, wiſhing them as need ſhall require to be vſed, eſpecially vpon ſuch daies as according to their ſeuerall miniſtrations ſhall be noted in theſe rules which follow.

In Bleeding and Purging, Bathing and ſweating, conſider whether it be to keepe the body in health, or whether it be to cure the body already diſeaſed: If it be to keepe the body in health, then conſider theſe rules following.

State of the body.	Age	Youth	Time of the yeare.	Spring, beſt

To bleed after the Complexions.

For the { Cholozicke / Flegmaticke / Melancholick / Sanguine. } The moone in { Cancer, Scorpio, or Pisces / Aries, or Sagittarius. / Libra or Aquarius. / any of these.

To order the Body before bleeding.

A Preparatiue to attenuate the humours by the counsell of the Phisitian, must be first receiued oftentimes before bleeding, but if time allow not so much, then a glister must be vsed ouer night, and then the veine opened in the morning fasting an howre or two after the rising of the Sunne, auoyding if it may be the howres of Saturne & Mars, and to draw such a quantity as shalbe thought conuenient by the learned Phisition or Chirurgion.

When { Melancholick / Sanguine / Cholozicke / Flegmaticke } may bleed { most of all. / lesse then they. / yet lesse. / least of all.

And after bleeding, may be permitted a draught of pure Claret wine with a toste, and vse meats of light digestion vntil the third day. And withall refraine

Of

Of Purging according to the Complexion.

Let the Moone be in { Gemini, Libra, Aquarius } for the Melancholick.

Let ỹ Moone be in { Cancer, Scorpio, Pisces } for choloryck & flegmatick.

How to order the body before Purging.

LEt the Patients body be prepared according as the nature of the humor to be purged shall require, either 3. or 5. or 7. daies before, and not to take the ayre the day of Purging in any case vntill the medicine hath done his operation. But after purging, it is left to the Judgement of him that giueth the medicine, for sometimes there falleth out strange simptoms and other accidents which are dangerous: Wherefore let not the Phillition be absent, vntill he perceiue well that all the danger is past.

Of Bathing.

Let the Moone be in these signes.

Libra, Pisces } Bath for cleanlinesse.

Aries, Leo, Sagittarius } Bath grosse bodies.

Cancer, Scorpio, Pisces } Bath dry bodies.

Note that after Bathing, the Body must be dried with hot clothes, and must lie in a bed with cleane dry sheets one houre or two.

For Sweating, let them vse the same order as in Bathing.

And if the body doe require administration to cure some disease, then consider these rules following.

In the body diseased, consider

The { Age / Complexion / Strength } of the bodie.

In the disease, consider the beginning, the increase, the state, and declination, vniuersally ouer all the body, or particular in some member. Consider also the nature of the disease that is to be cured: the quality of the medicine that cureth: the manuall and externall operation, the inward administration medicinall.

When all these things are considered, then in the name of GOD proceed according to Art, as the time shall permit, and the disease require, neuer staying for a chosen day, houre, and time, least delay cause more danger. But remember alwaies, that you giue no Purging medicine the Moone being in Leo, nor to cut a Veine or make incision when the Moone is in the signe that gouerneth the member where that operation and worke is to be done.

Cer-

Certaine ſhort remembrances what is to be done in euery moneth through the yeare.

Ianuary.

CUt downe your timber woods, and it ſhall not thinck nor neiſe. Stub and root your meadowes and errable grounds, ſo if you doe, your ſtubble ſhall not grow againe. And theſe thinges are conueniently don within fower dates of the latter of the Moone, moreouer digge your Gardens and trim them with compaſſe, remoue your Bees, vnwry the rootes of your trees that beare fruit, and moiſten thoſe that are waxen barren, make ready your plow tackle and fallow your land for Wheat and Rye: rip vp your lay ground for Oates, that it may be ſeaſoned and mellow.

February.

IN February diſcharge your fruit trees of their moſſe and noyſome outgrowings: prune away all ſuperfluous branches, lay quicklets, plant Roſes, and ſuch like. Cut, lappe, plaſh, and twiſt hedges and hays at the latter age of the Moone. Graffe and ſet trees, ſlips, branches, and bare knots, at the full of the Moone at night. Riffe vp your layd Land, and ſow Beanes, Peaſe and Oates, in dry ground, in the new of the Moone, in watrie and moiſt ground, after the full Moone, or within Fower dayes before or after the ſame.

March.

IN March ſow Peaſe, Beanes, and Oates, in the beginning Graffe and Plant fruite trees, and eſpecially in the

end

end of March, couer the Roots of your fruit Trees (that were bared before in January) with fat earth at the full of the Moone. And first cliffe the Roots and driue in wedges, and bore holes through the trees, and stop the same again with pinnes, all which bee meanes to cause them bring forth fruit againe. Also Plough and labour your Barly land, carry your doong to the field, and chiefely in the last quarter of the Moone, so shall you be sure it shall not dry away.

Aprill.

IN Aprill sow Barly in strong land, and the in South parts of England sow Hempe and flare, and your Garden seeds and set your Garden hearbs about the end of Aprill.

May.

IN May sow Barly, in the beginning set your cucumers, and mellons, sow leekes, Onions, purslaine, Cortander, Smallage, and Basill, then stirre your land, the first stirring for Wheat and Rye.

Iune.

IN June carry forth your dung to cheare your wheat and Rye lands, bring home your Fuell, set leekes at the end of the month, and sow tender hearbe seedes, mowe downe your low Medowes lying neere vnto the water sides.

Iuly.

IN July cut downe your high Medowes and much of your other grounds, (the continuance of faire weather is doubtfull) make emplastration for Roots, lay the knots naked in fruite trees, and about the end of July put your sickle into part of your hard Corne.

August.

AUgust is a time most meet to pull and gather your Summer fruits: reape downe your Rye and Wheat, and get it into the Barnes, & about the end downe with your Oats. And stirre the latter stirring for Wheat and Rie.

September.

SEptember being now come reape your Barly, Peaſe, and Beanes: and about the midst of this moneth sow wheat and Rie in strong land, carry your compasse for wheat & Rie, for one load now is worth any three before this moneth.

October.

October.

IN October sow wheat and Rye ouer all, and chiefely in the beginning, for feare of raine in the end. scowze your ditches and ponds, set plums, Peares, and Apples: remoue trees, set Almonds and Walnuts, cut and plash your hedges and trees

Nouember.

IN the beginning of Nouember, for the most part it is good to sow Wheate and Rye in hot grounds, set and remoue Peares, Plums, and apple Trees, namely, into drie warme ground. Cut downe your timber wood in the wayning of the Moone, & especially your ash-wood for al your Plow tackling & fallow your land for Barly.

December.

IN this moneth of December cut down your Timber-wood to build or other like purposes, brush hedges, and Superfluous branches, take Birds and Fowles with nets, and lime-twigs, and fallow your land for Barly.
